Updated C4 Architecture Diagrams	13.3%	4
TOTAL	100%	30

What To Turn In

You'll turn in a zip file containing

- Your source code (no .class files or target directory)
- Your Deployment Summary document (in pdf format)

★ Please follow naming format: `firstname.lastname.class.assignmentnumber`

★ **example:** `sergey.sundukovskiy.se320.assignment3.zip`

I should be able to unzip your file into a directory, then cd into your root directory and run the command

- **`mvn clean`**
- **`mvn install`**
- **`mvn exec:java "-Dexec.mainClass=com.digitaltherapy.DigitalTherapyAssistantApplication"`**

I should be able to access Swagger URL

- <http://localhost:8080/swagger-ui/index.html>

I should be able to access H2 Database populated with data

- <http://localhost:8080/h2-console/login.jsp>

I should be able to access and register for the application

- <http://localhost:3000/>

I should be able to access and register for the application

- <http://<elastic-ip>:3000/>

 **Caution:** When you believe you're done, try zipping your files, then unzipping them into a totally different directory and following the steps above. In other words, test your packaging before you submit your assignment.
